

**CLAIMS**

I claim as my invention:

1. A compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers which comprises a holding container having sufficient thickness, width and length having a top having sufficient thickness, width and length, having a plurality of recess areas, having sufficient width and length, a bottom having sufficient thickness, width and length, having an adhesive material, having sufficient thickness, width and length, having an adhesive protective cover, having sufficient thickness, width and length, a first side, having sufficient thickness, width, length, having a radius corner having sufficient area connecting said first side to a third side, having sufficient thickness, width and length, having a radius corner having sufficient area connecting said third side to a second side, having sufficient thickness, width and length, having a radius corner having sufficient area connecting said second side to a fourth side having sufficient thickness, width and length, having a radius corner having sufficient area connecting said fourth side to said first side.
2. The compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers of Claim 1 wherein said top having sufficient space between said plurality recess areas.

3. The compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers of Claim 1 wherein said first side and said second side to be parallel to each other.
4. The compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers of Claim 1 wherein said third side and fourth side to be parallel to each other.
5. The compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers of Claim 1 wherein said holding container having said adhesive material on said bottom allowing said holding container to hold firm to any flat surface by first peeling off said adhesive protective cover, then by pressing downward on said holding container.
6. The compact utility holder for drinking glasses, cups, mugs, utensils, condiment and cosmetic containers of Claim 1 wherein said holding container by pulling upward causing the said adhesive material on said bottom to let loose of the attached flat surface allowing said holding container to be reattached to a different location as required by user.
